# XENTIA

## Dual Shade Pergola

A fresh take on freestanding shade, the Xentia's superior cooling and clean lines elevate the simple pergola to a sophisticated shelter for resorts, public spaces, and high end domestic applications.

- An architectural grade, PVC outer canopy, that is waterproof, heat reflective, and UV resistant, keeps customers cool, dry and sun- safe.
- The dual shade configuration facilitates cooler temperatures undercover and presents a stylish interior finish.
- Strong, but lightweight, the Xentia can be installed on virtually any level surface, without the need for heavily reinforced footings.
- A modular dove tail coupling system ensures quick and easy assembly, with the option to be owner installed.
- Compatible accessories such as lighting, blinds and shutters, transition your space from day to night.
- Engineered to withstand winds up to 148kph, the Xentia is suitable for both elevated and coastal locations.

SKYSPANSHADE

XENTIA

Clean lines and premium materials combine in an outdoor shade structure that has both style and substance.

The Xentia's frame and componentry are extruded from a corrosion resistant, 60/60 aluminum alloy, and powder coated white for a smart, easy care, finish. The outer canopy is a high tensile, architectural grade PVC that lends support to the frame and ensures the pergola is cool and dry, deflecting heat and harsh UV rays.

A second woven under canopy presents a fresh interior ceiling that filters the diffused light from above. The dual chamber configuration facilitates airflow and minimises heat transfer for lower temperatures under cover.

A resilient PVDF coating protects the waterproof outer canopy against fading and staining, but both canopies can be removed for cleaning if desired.

### Compatible Accessories

Built in LED spot lighting, blinds, privacy screens, or shutters can be added so the Xentia is just as pleasant on a summer evening as it was during the day.

The canopy and privacy screens can also be screen printed to promote your brand. Our direct to fabric screen printing uses high quality colour fast inks, for accurate colour matching and resistance to fading.

### Extendable Bays

Modular in construction, the Xentia's interlocking, componentry makes the pergola quick and easy to assemble, and simple to extend. The standard range offers sizes from 9m<sup>2</sup> up to 16m<sup>2</sup>, with the option to connect additional bays to the existing structure for customised sizing and continuous cover.
