VISTA

Cantilevered Umbrella

Vista means view. Make the most of yours under the generous shade of our popular side column retractable umbrellas. The Vista's offset column and expansive canopy maximises clear space undercover, making it perfect for poolside and outdoor dining.

- Sophisticated robust internal gearing system allows the swift and easy operation of the umbrella.
- Purpose built to perform outdoors, the Vista's open canopy has been engineered to withstand wind speeds up to an impressive 118kph open, 148kph closed.
- Multitude of sizes offer extensive shade coverage.
- An optional rotational base rotates the canopy a full 360° to follow the sun throughout the day.
- With the addition of extra booms, suspend up to 4 canopies off a single column maximising your clear space undercover.
- An architectural grade, PVC Canopy, that is waterproof, heat reflective, and UV resistant, keeps customers cool, dry, and sun-safe.
- Accessories such as heating and lighting can be installed to transition your space from day to night.

VISTA

Features

Built for commercial use, the Vista is unique in that does not require any heavy equipment, or extra assistance to open and retract its sizable canopies.

Retractable Operation

A simple hand wound handle connects with a robust internalised gearing system, for quick and efficient operation of any sized canopy.

The handle is then detached from under the canopy and the umbrella is secured into place with an anti-creep latch. The umbrella is then locked safely in the open position.

Corporate Branding

With our “direct to fabric” print service, professionally promote your brand on your canopy using colour fast inks for accurate colour matching and a premium finish.

Compatible Accessories

Pre-wiring is available to accommodate heating, LED lighting, speaker systems and power points, to enhance your outdoor experience.

Rain diverters can be attached to the Vista's waterproof canopy to channel away water, and removable link panels can also be added, connecting multiple umbrellas for continuous dry cover, and extended use of your outdoor facilities.

VISTA

Premium PVC Canopy

An architectural grade PVC adds strength and style to the canopy. Purposefully designed for umbrellas, the Vista's canopy fabric has been pre-tensioned in manufacture to prevent stretching and tearing after continuous use.

Choose from a multitude of colours that have been tested and rated by their ability to reflect, absorb and transfer heat, ensuring the umbrella is cool and comfortable to be under.

A protective PVDF coating has been applied to the canopy stabilising the colour pigment in the fabric for fade resistance to pro-longed sun exposure.

The flame retardant, anti-fungal and dirt repelling properties of the canopy make it easy to keep clean and ideal for commercial environments.

A permanent UV surface treatment stabilises the colour pigment in the fabric to resist fading, and provides an Ultraviolet Protection Factor of 50+, blocking harsh UVA and UVB rays.

- Support Australian Industry
- Products specifically designed to suit Australian conditions.
- Shorter lead times than imported products.
- Parts and Accessories are readily and easily available

Commercial Construction

The Vista's galvanised structural steel frame is assembled with marine grade 316 stainless steel componentry and powder coated in a colour of your choice, for a smart, easy care, finish.

A protective PVDF coating has been applied to the canopy stabilising the colour pigment in the fabric for fade resistance to pro-longed sun exposure.

The flame retardant, anti-fungal and dirt repelling properties of the canopy make it easy to keep clean and ideal for commercial environments.

Engineered for Performance

With umbrella weights between 260 – 360kg the Vista has been designed and engineered for permanent fixed installation outdoors.

Capable of withstanding wind speeds up to 118kph whilst open, you'll have ample time to retract the umbrella in changing weather conditions. Once closed, the Vista will stand safe and secure in winds up to 148kph, ready for future use.
